INTERNATIONAL CONSENSUS MEETING

ON IN SITU HYPOTHERMIC, ANTE SITUM AND EX SITU HEPATIC RESECTION

Hamburg

ASKLEPIOS
KLINIK BARMBEK

Hospital Universitario
Miguel Servet

DEAR COLLEAGUES,

We are pleased to invite you to our groundbreaking Consensus Meeting on the advanced techniques of in situ cooled liver resection, ante situm, and ex vivo liver resections. This meeting provides a unique opportunity to discuss the latest developments and address the open questions in this highly specialized field.

Significant progress has been made in the surgical treatment of liver diseases in recent years. The techniques of in situ cooled liver resection, ante situm, and ex vivo liver resections, in particular, offer hope and possibilities for patients with complex liver conditions. Despite these advancements, numerous unresolved questions and challenges remain that need to be addressed.

Our goal is to bring together experts from around the world to provide a comprehensive overview of the current state of the art and to develop common guidelines.

We warmly invite all global experts and researchers engaged with these innovative technologies. Your participation and contributions are invaluable for the success of this meeting and the advancement of our collective efforts.

We are confident that this meeting will make a decisive contribution to the advancement of liver surgery. Let us work together to resolve the open questions and shape the future of liver surgery.

Best regards,

Prof. Daniel Azoulay

Prof. Dr. med. Thilo Hackert

Prof. Dr. med. Karl J. Oldhafer

Prof. Dr. Alejandro Serrablo
